# Heroes Day

Dear SHS students & parents,

Friday 10 November 2023, as we remember Heroes Day (Hari Pahlawan), we're not just thinking about the brave people from our history but also finding inspiration for our school journey.

Heroes Day teaches us that being great comes from not giving up and sticking to what we believe is right. The stories of our heroes show us that we can overcome tough times. As students, when things get hard, let these stories inspire you.

In school, we face challenges like tricky subjects or personal struggles. Our heroes teach us that we can do well by staying strong and always trying to learn. Let their stories guide you when you're finding things tough, helping you do well in your studies and discover more about yourself.

Be determined and keep going. Let Heroes Day push you to be a hero in your own way at school. Today, we honor our past heroes, and let's also see the heroes within ourselves, working hard and succeeding in our studies.

Thank you, and let Heroes Day encourage all of us to be heroes in our school adventure.

# Kami Indonesia Program

## 12 St. Benedict

## Other Activities

Kami Indonesia Program last week features East Kalimantan Province. The students of 12 St. Benedict enthusiastically showcase the cultures in Samarinda in a captivating manner. Kami Indonesia Program serves as a platform for each class to introduce various cultures, foods, and distinctive features of provinces in Indonesia. This event also serves as a practice arena for students to perform in public and practice organizing a simple yet engaging program

## **Science Film Festival**

## **Other Activities**

The Science Film Festival is an event where students learn about science through short films and practice it in a simple manner. The theme of SFF this time is the Protection and Restoration of Life Ecosystems Worldwide, with the sub-theme The Impact of Carbon Dioxide (CO<sub>2</sub>) gas on Life Ecosystems. Through this event, it is hoped that students will be able to take action to reduce activities that contribute to the emission of CO<sub>2</sub> into the atmosphere.
