*integrity*

*resilience*

# OPEN HOUSE: TRADITION IN MOTION

Carlo Emmanuelle Soetrisno

What happens when tradition meets student imagination? What if tradition wasn't just something you were studying but something you experienced? This was the concept for This Term's Open House. This Year's SJGS Open House wasn't just a mere event but a phenomenon that brought culture and rich tradition to life through student innovation, turning heritage into experience. Every corner of the school showed Indonesia's true colors and ancient past.

Each class transformed into their own mini-booth about a randomly selected tribe of Indonesia (ex: Banjar, Bajo, Ambon, etc.). Tasked to build **Games, Food & Drink, Souvenirs, and Decor**, each correlating with their topic tribe, the classes worked diligently to leave a lasting impact on visiting guests, that we show pride in our diversity and culture

What truly fleshed out the Open House was the additional events. An Opening Ceremony was in order, which took place in the lobby of our school, including a **traditional dance**, a **Garuda-themed fashion show** with two representatives from each class, **band performances** that lasted the whole day, and even a **coaching clinic** for those interested in **basketball**.

There were not just traditional booths but also subject booths to promote the school's curriculum in non-class rooms. Accompanied by each subject teacher(s), each booth had their own unique and fun activities that correlate with said subject.

This Year's Open House for SJGS was nothing short of creative. It made students realize and consider the traditional and ancient history embedded deep in our culture and heritage. It allowed guests to see the beauty of Indonesia, the creativity of students, and the school curriculum all in one event.

# SAINT JOHN SYNC 2025: AETERNOVA

Giselle Cai, Vanessa Lovynes Wangsa, Oliver Nathan Purnomo

During the months of August and September 2025, SYNC had the school buzzing over the course of a few weeks. Competitions lit up every day, with students giving their all. Cheering, competing, and showing off their best skills. SYNC unfolded like a story, each competition a new chapter. Each victory a spark, each moment building towards something greater.

## SYNC OPENING

SYNC started off with all the students gathered in the Aquila Hall, filling up the space with excitement. Along with a venue in front where merchandise of the event would be sold. The event opened with an inspiring speech by Ms. Anne, our principal followed along with a series of fun basketball games between students, teachers, and the guest stars, Happy Ballers.

The friendly match went for more than an hour, with memorable prizes that were given throughout, creating an unforgettable start for SYNC.

## COMPETITIONS AND ACTIVITIES DURING SYNC

The first day of SYNC's competition started off with *Menulis dan Membaca Puisi* and Story telling where participants showcased their creativity, emotion, and talent. While participants focused in the quiet room, another competition took place on

the stage, making it come alive with music and dances. The traditional dance competition, a contest that showcases graceful movements, cultural pride, and stunning performances that captivated the audience.

As the day continued, the atmosphere changed from calm, artistic and literary expression and traditional arts to high energy sports with the basketball tournament. The court came alive as teams from many different schools across this regency competed fiercely. Each match brought intense plays and loud cheers, making a strong and spirited start to SYNC's lineup of events.

Upon the arrival of the third day, Jiu Jitsu and Basketball competitions came to the equation, involving the significant dedication, physical conditioning, and strategic thinking that had been incredibly displayed by participants.

The following five days were packed with the sequel of dynamic movements and mutual synergy from basketball matches, where each team continuously strives to seize the victory in the midst of pressure and competition.

## SYNC CLOSING

Finally, as like all things end, SYNC would come to a close. On Saturday of September 13, there were performances led by students and teachers to start. They would perform their talents such as dancing, singing and more. Not to forget the prizes that were given out by chance throughout the day. As the day neared a finish, there was an amazing performance by the guest star, Aviwkila, who helped close with unforgettable songs. Bringing everyone together to sing along, completely lighting up the day even more.

As we come to a conclusion, the event brought students, teachers and people from other schools together. Through celebration and loss, the bond between people only strengthened.

# MORE THAN JUST SOAP

Elisabet Alvina Wijaya

A few weeks before Quarter 1 ended, teachers of all subjects began to explain their criteria for the Integrated Project. It was a time to focus, as this project could greatly impact grades. Whether lucky or not, the grade 8 students were given the topic of bar soap.

Students were separated into five groups in each class, and each group had to create its own unique soap. The soaps were first made in chemistry class, where students needed to bring their own essential oils and molds. Of course, making the soap was not the only task. Students were asked to complete assignments from each subject teacher based on their specific guidelines; some teachers asked students to write about the benefits of the soap, and one subject even required the creation of a promotional video.

With all these tasks to finish, it certainly would have been a mess. However, to keep everything neat and compiled, students were asked to create a website using Google Sites to present all their research. After around two weeks of work, students presented their websites in front of three teachers, explaining what they had done for each subject. Following the presentations, students were also asked to write a 600 to 1000-word essay reflecting on their experience during the Integrated Project. Through this project, students learned many valuable skills, such as soap-making, web design, time management, and much more. Ultimately, this project was a challenging experience that taught students how to combine knowledge from different subjects into a single, creative product.

# GRADE 7 SUBJECT TRIP: YAKULT & ANIMALIUM!

Priscilla Claire Kimberly

Last week, Grade 7 took a fantastic subject trip! We explored two very different but equally interesting places: PT Yakult Indonesia Persada in Sukabumi and the Animalium BRIN in Bogor. This journey brought our Science and Social Studies lessons to life!

## YAKULT FACTORY: THE SCIENCE OF TINY HELPERS

Our first stop was the high-tech Yakult factory. We were amazed to see the massive scale of their operation!

We learned that every bottle contains billions of **helpful bacteria** called **Lactobacillus casei strain Shirota**. These are the "good guys" that help keep our digestive system healthy. The factory staff explained how they carefully grow these microscopic helpers. We watched the whole process: mixing the ingredients, sterilizing the liquid, and finally, the famous assembly line! High-speed machines quickly fill, seal, and package the small bottles. It was a great example of **modern industrial technology**.

## ANIMALIUM BRIN: OUR WILD NEIGHBORS

Next, we explored the Animalium research center in Bogor. This place is all about studying and protecting Indonesia's wildlife. We saw amazing exhibits about animals from all over Indonesia, like tigers and rare birds. We learned about conservation, the important work scientists do to save species that are in danger. This part of the trip taught us about **biodiversity** (the variety of life on Earth) and how research helps us protect our environment.

# FROM BATTER TO KNOWLEDGE

Elisabet Alvina Wijaya

With all the stress and pressure of Quarter 1, students were able to take a break by going on a Subject Trip. Subject Trips are important for maintaining a balanced routine, especially with the many assignments. Students gained new skills and experiences with their teachers and friends. This quarter, the grade 8 students went to Kayla Bakery to learn about the process of baking.

Upon their arrival, the students were met by the welcoming staff, who gave them instructions. The grade was separated into two groups. The first group watched the process of creating a cake, while the second group decorated pre-made chiffon cakes provided by the staff. When making the cake, the staff used precise measurements to ensure it was perfectly cooked. Students were given a chance to help mix the batter and put it into the molds to further understand the cake-making process. After the first session ended, the groups switched; the first group began to decorate their cakes while the second group observed the baking demonstration.

When decorating the chiffon cakes, students were free to use their imagination with the provided toppings. After they finished, their creations were packaged for them to take home. By the time the sessions ended, it was already time for lunch. The staff provided food, and since it is a bakery, they also sold various products. Although it was optional, students were given time to purchase items from the bakery to bring home and enjoy.

# DAIRYLAND FARM THEME PARK

Vanessa Sharon Regina

Cimory Dairyland was the place 9th grader students of Saint John Gading Serpong went for their field trip. They went there by buses based on their class, 9 Abigail, Daniel, and Noah. Once they had arrived, they went to explore the place together with their tour guides.

The students first went to the animal farm, where they were able to learn about animals, their whereabouts, and did activities such as milking the cows, petting and taking pictures with various animals, and even feeding them (cows, horses, sheep, snakes, birds, iguanas, etc). These animals can range from mammals to reptiles to aves. After doing so, they gathered around to watch how they shave sheeps' wool and make balloons. The performance was entertaining and fun as they allowed volunteers to try.

Dairyland farm theme park, formerly known as Cimory Dairyland, first opened in 2006 located at Puncak, Bogor, it is a theme park owned by the Cimory company. It was designed as a tourism venture and a place that is entertaining and educational for those who visit. The place was Netherlands themed based off of the structure and decorations of the park. The place has a lot of farm animals alongside with their whereabouts, the Milk Museum for learning about dairy, and outdoor activities like horse riding, tractor tours, go-karting, a food court and various areas selling beverages and snacks, and so much more. These things are great for tourism attraction and have been a go-to place for families and foreigners as a place of entertainment!

The students went to eat in the cafeteria where they were served bento once the performance was completed. Afterwards, students were free to do as they wished around the premises as long as they regathered at a specific time. Not long after, they went back to the bus, sang songs together, and arrived back to school safely.

# A GLIMPSE INTO THE FUTURE: CAMPUS VISIT TO ATMA JAYA

Alexander Simanjuntak Indravarman

Choosing a university is one of the most important decisions for a senior high school student's future. In order to help students prepare for this milestone, Saint John's School Gading Serpong continuously supports and guides the students by introducing various universities and future pathways all around the world. As part of this, on Tuesday, September 30, 2025, the Grade 10, 11, and 12 students of Saint John's School Gading Serpong, accompanied by their homeroom teachers and homeroom advisors, visited Atma Jaya University.

Once the students arrived at the campus, all of the students were gathered in the aula to get to know more about the university itself. The first session introduced a lot about the university such as the university's background, faculties, and study programs, giving students a better picture of the opportunities available in life. To make the session even more engaging, the students participated in a short Quizizz game that tested their knowledge about the university in a fun and interactive way. During this moment, the atmosphere was filled with lots of positive emotions from excitement to laughter.

After the opening session, the students were divided into two groups based on two different study fields, IPA (Science) and IPS (Social Science). This grouping allowed for each student to experience activities that matched their interests and future goals. Throughout the day, students explored different parts of the campus while participating in mock classes and hands-on workshops prepared by Atma Jaya itself.

The IPS students joined several interactive workshops, including a business class where they learned how to create a product and how to pitch it. Another exciting activity was the cooking and brewery class, where students learned to make éclairs and tried making lattes. These activities allowed students to experience learning in a fun yet professional way.

Meanwhile, the IPA students took part in science based classes and workshops. Students were able to try electrical engineering by building LED circuits which taught them the basics of electricity and how some simple components work together. They also tried a bit in the food technology field, by having a workshop where students got to know more about the chemistry behind pudding-making by turning liquids into solid desserts through chemical reactions. These activities were very because it encouraged students to think critically while applying science in real-life situations.

At the end of the day, all of the students gathered back in the aula for a closing session, which marked the end of the campus visit. The campus visit experience really helped students in giving a clearer picture of what university life is, while at the same time motivating them to prepare for their future with some skills. This campus visit to Atma Jaya University will remain one of the most memorable moments of the 2025 academic school year, an experience that brought the students of Saint John's School Gading Serpong a step closer to their dreams.

# UNITED NATIONS DAY

Kellysa Joanna Evelyn

In the morning of October 24th, 2025, the spirit of global unity came alive at Saint John's School during our annual United Nations Day celebration. The event reflected our school's values, which beautifully displayed the world's international culture.

The event was held in Priscilla Hall, which had been decorated thoughtfully for the occasion. As students entered, they were greeted by a captivating scene. Along both sides of the hall, each class had created a display featuring the cuisine of their assigned country. It was a true culinary journey that allowed everyone to explore the world through taste.

Adding to the wonderful experience, our dedicated teachers and staff proudly wore traditional attire from various nations, offering students a visual story of global heritage. The energy in the room built as students took to the stage for a series of performances, showcasing songs and dances in multiple languages to captivate the audience.

The event builds up with a show that much all students awaits for: student fashion show. As representatives from each class walked the runway, they displayed their country's traditional dress and costumes. Each student paused to share a welcoming greeting in their nation's native language, a simple yet powerful gesture that highlights the beauty of our diverse international culture.

# STUDENT COUNCIL PRESIDENT ELECTION

## 2026-2027: A NEW GENERATION OF LEADERS

Olivia Ran Widhana

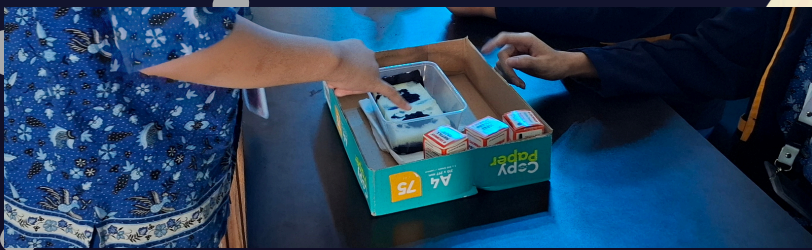

Our school, Saint John GS, just wrapped up one of the most exciting events of the year: the Student Council Election. It all started off with Campaign Day on Friday, October 31. The aula was loud, colorful, and honestly a bit chaotic in a good way. All the candidates showed off their posters, big smiles, bold speeches and lots of ideas for making our school better.

One week later, on Friday, November 7, everyone came back for Debate Day. This was the moment when students and teachers could ask anything and see how each team handled real problems. Some teams focused on making school more fun, while others talked about keeping students safe and supported. This day helped us students and teachers to prepare on which president and vice duo we will choose. Then came the big day. Election Day on Friday, November 14. At the start the candidates proceed to introduce and explain their vision and mission for the last time.

The current Student Council then helped organize the lines and reminded everyone to vote and the rules. Students lined up one by one to the stage and had to submit a google form on a computer behind a box, so that no one could see who you're voting for. You could just feel the excitement everywhere as people tried to guess who would win president and vice president.

After the voting session ended, the results were finally announced. In Junior High, the winners were The Visionaries: Carlo as president and Priscilla as vice president. Their campaign message was all about listening to students and turning ideas into real action. A lot of people liked how friendly they were and how they made everyone feel included.

In Senior High, the winning team was Velocity: Florence and Dylan. Their goal was to make school feel more connected. They talked a lot about creativity, teamwork, and events that bring everyone together. Their posters were super bright and bold, and everyone said they had great energy.

When the winners were announced, the whole school buzzed with excitement. People congratulated the new leaders, and right away everyone started talking about new clubs, new activities, and everything that could happen next year. Now we're all waiting to see what these new leaders will bring. With The Visionaries in Junior High and Velocity in Senior High, it feels like the school is ready for a year full of spirit, teamwork, and fresh ideas.

# TEACHER'S DAY CELEBRATION

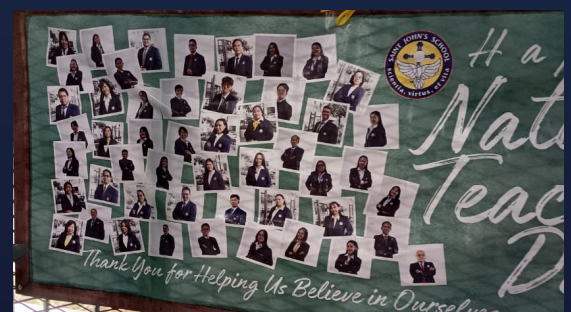

Carlyn Allison

November 26th, we celebrated one of the days teachers look forward to the most, Teacher's Day celebration. Usually, this day is celebrated on the 25th of November; however, it had to be postponed. The English and German clubs collaborated to prepare an unforgettable surprise. Both clubs prepared the gifts and decorations a few days beforehand, which gave them spare time to organize everything in the morning. The celebration took place in front of the teacher's room at 7:15 in the morning under the supervision of Ms.Carril.

The goodie bags we prepared consisted of some light snacks, a mousepad with a group picture of the teachers, specialized Pokémon cards, bottles, customized picture frames, and plaque. Not only that, with Ms.Carril's help, we managed to arrange two special performances. The first performance was led by Shawn Rayner Lie, who recited a poem in Bahasa Indonesia about the importance of teachers. The combination of emotions from the poem and his confidence was truly astonishing to witness. As for the last performance, the English club decided to dance and sing to a song called "Guruku tersayang" made by Melly Goeslaw.

Overall, this celebration was truly exciting for us to prepare and organize with our own creativity. We hope that this event will motivate teachers to keep moving forward, disregarding the hardships along the way. After all, teachers are one of the reasons why we can shine in our own way. We will definitely look forward to recreating this event next year with more new fun ideas!

# INTRAMURALS: UNLEASHED

Carlo Emmanuelle Soetrisno

Think you know Intramurals? Think again. What if every game were not just played but reinvented? This was the main theme for this year's Intramurals. Not only were games played, they were also changed. Each standard sport internationally played was turned into something brand new.

The topic for this year's Intramurals were completely unique and different. The topic, simply named "Indomie," might sound unusual at first, but that's exactly the intention. The event leaned towards a more fun and playful side of the school, utilizing the unique topic to keep things light, enjoyable, and creative.

Before the sports even started, the event opened with a pregame called "Dress to Impress," inspired by the Roblox game. Participants were given a pile of clothes, props, and random accessories to create quick outfits based on themes shown on the screen. The game wasn't really about making the perfect outfit, but it was simply a chance for everyone to loosen up, break the ice, be creative, and start the day with something a bit unpredictable and entertaining.

In conclusion, this year's Intramurals wasn't really about perfection. But the vision was about having fun together in a new way. The twists, theme, and surprises made the event something students could enjoy, remember, and talk about long after the games were over.

The main sports for this year's Intramurals were Basketball, Soccer, Volleyball, and Dodgeball, but each one came with its own twist to keep things interesting. Every game had a small challenge added to it. Nothing too serious, just enough to entertain students. For example, Dodgeball required everyone to wear acupuncture shoes while playing, which definitely changed how fast people wanted to run. These little twists didn't take away much from the competition, they just made the games a bit more unpredictable and gave everyone something to laugh about along the way.

# A FUN WAY TO END THE YEAR

Elang Adam Rinald

The year is concluded with a party unlike any other. Hosted by the Student Council, the Year End Party was played out with games, performances and a potluck. However, at the very beginning, a Holy Mass was conducted to formally open the Year End activity.

At exactly 3 PM, each class hosted their own parties with respective themes and activities, some hosted Secret Santas, gifting their friends with presents while others brought an abundance of food and beverages. Some classes had so many that it was shared to School Staff and other classes, this act of kindness of course brought the high school community as a whole closer as shown in the following activities and events.

The following hours, approximately from five o' clock to seven, students and teachers alike gathered at the Priscilla to continue the Year End festivities. There were students banding together for a song, a choir performance conducted by Ms. Endar and Mr. Steven singing Arjuna by Dewa 19. The Year End Party also marked the end of the 2024-2025 Student Council Body, spectacularly shown through a video composed together by Reagan, telling the journey together as a part of the school's community, closing the year for the Student Council of 202 and opening another for the next academic batch.
