ADDITIONAL ACADEMIC NOTES:

Mechatronic Engineering

Progression to Level 5 and 6: For Thermodynamics – students should undertake directed reading prior to joining the DMU programme. DMU Engineering staff can advise.

Alternatively, completion of Thermodynamics and Heat Transfer Level-4 module is sufficient for Mechatronics students to cover DMU thermodynamics content at both Level 4/5.

Progression to Level 6: Sufficient Matlab skills need to be covered as part of Level 5 to ensure a working knowledge of MATLAB programming.
To ensure that students can cope with DMU level 6 studies they should complete all Level 5 modules before coming to DMU.

Product Design

Because there is no significant or standalone content devoted to materials and manufacturing in APU Level 4, it will be necessary for transferring students to pursue independent learning using provided resource links and a reading list based on the existing Level 4 module Materials and Manufacturing Technologies. This learning will take place prior to students starting at DMU.

Applicants for design led courses need to demonstrate evidence of design development through the submission of a portfolio of work to demonstrate the essential skills. Acceptance is at the discretion of the course leader and there may be a requirement for an interview.

Note: Level 5 is equivalent to Year 2 and Level 6 is equivalent to Year 3.

ENGLISH REQUIREMENTS:

The standard English language requirement is IELTS 6.0 with no less than 5.5 in any one language skill OR equivalent. Those students who have achieved less than the required minimum may be eligible for pre-sessional English programmes. APU/APIIT students who have completed Year 1 or Year 2 may be exempted from English language requirements.

BURSARY:

GBP 2,500 reduction in tuition fees*
*Entry criteria as listed in Schedule 1. Students will be awarded upon submitting an application and receiving an offer from DMU.
